Our systems solve your problems successfully.

Circular saws

Stellite circular saws (ST.)

200 to 1,200 [mm]

Circular saw range

All our circular saw types are manufactured to meet the individual application area of the relevant customer. We can therefore guarantee maximum performance for every customer. All circular saw

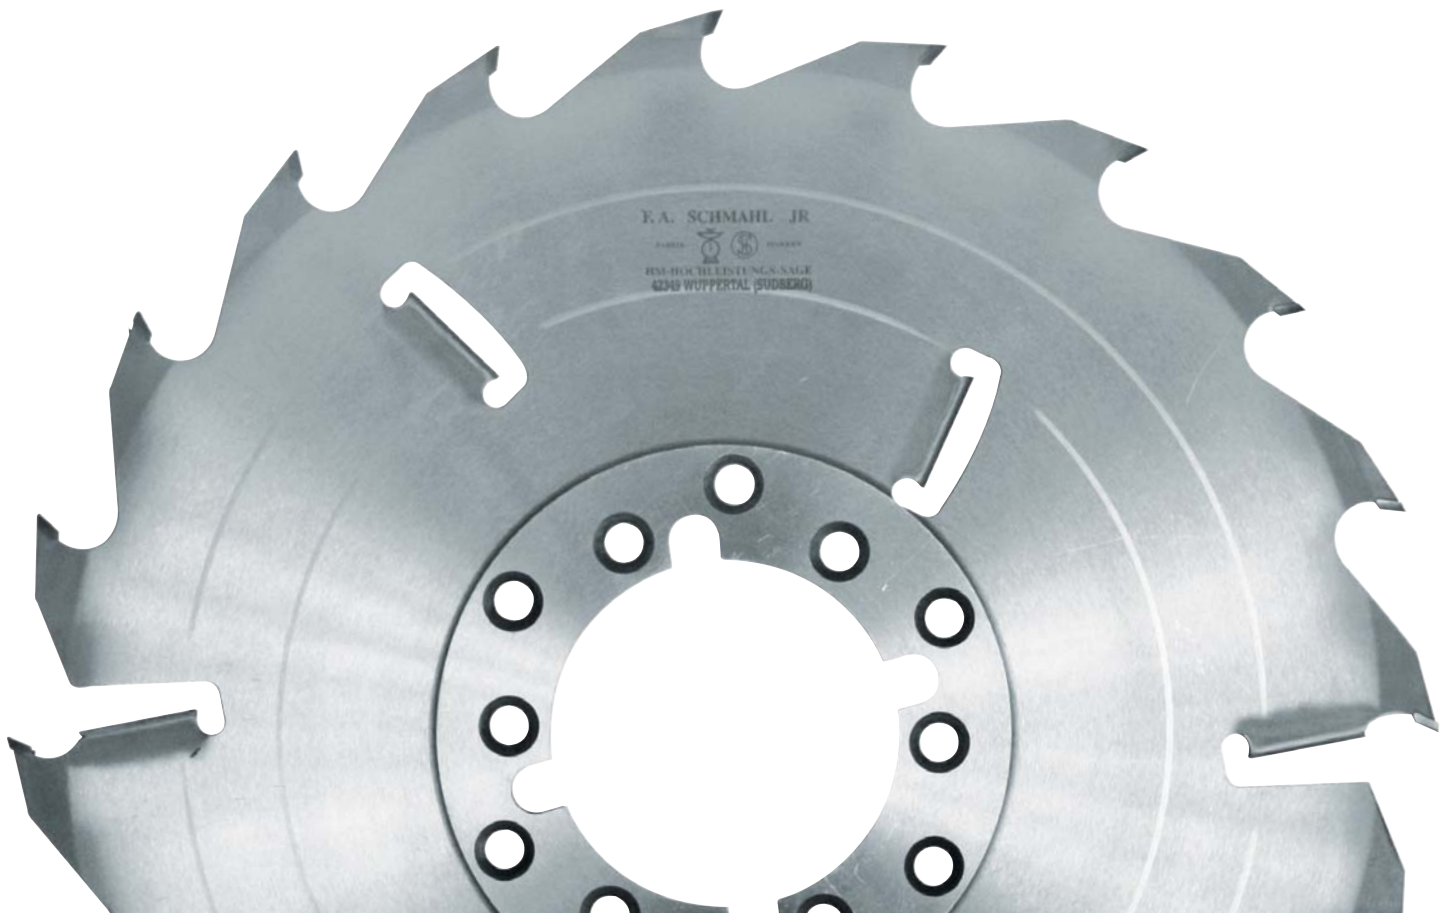

versions can be supplied with wiper slots and / or additional noise-reducing equipment (H-slots, expansion slots with copper rivets etc.).

Carbide-tipped circular saws (HM)

Diameters from
150 to 1,200 [mm]

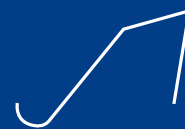

optional
1,200 to 2,000 [mm] with
replaceable carbide sprung teeth

In the area of Stellite and HM circular saws, we can offset the circular saw blades on one or both sides as required.

We therefore supply you with the optimum circular saw for your application.

Tooth shapes

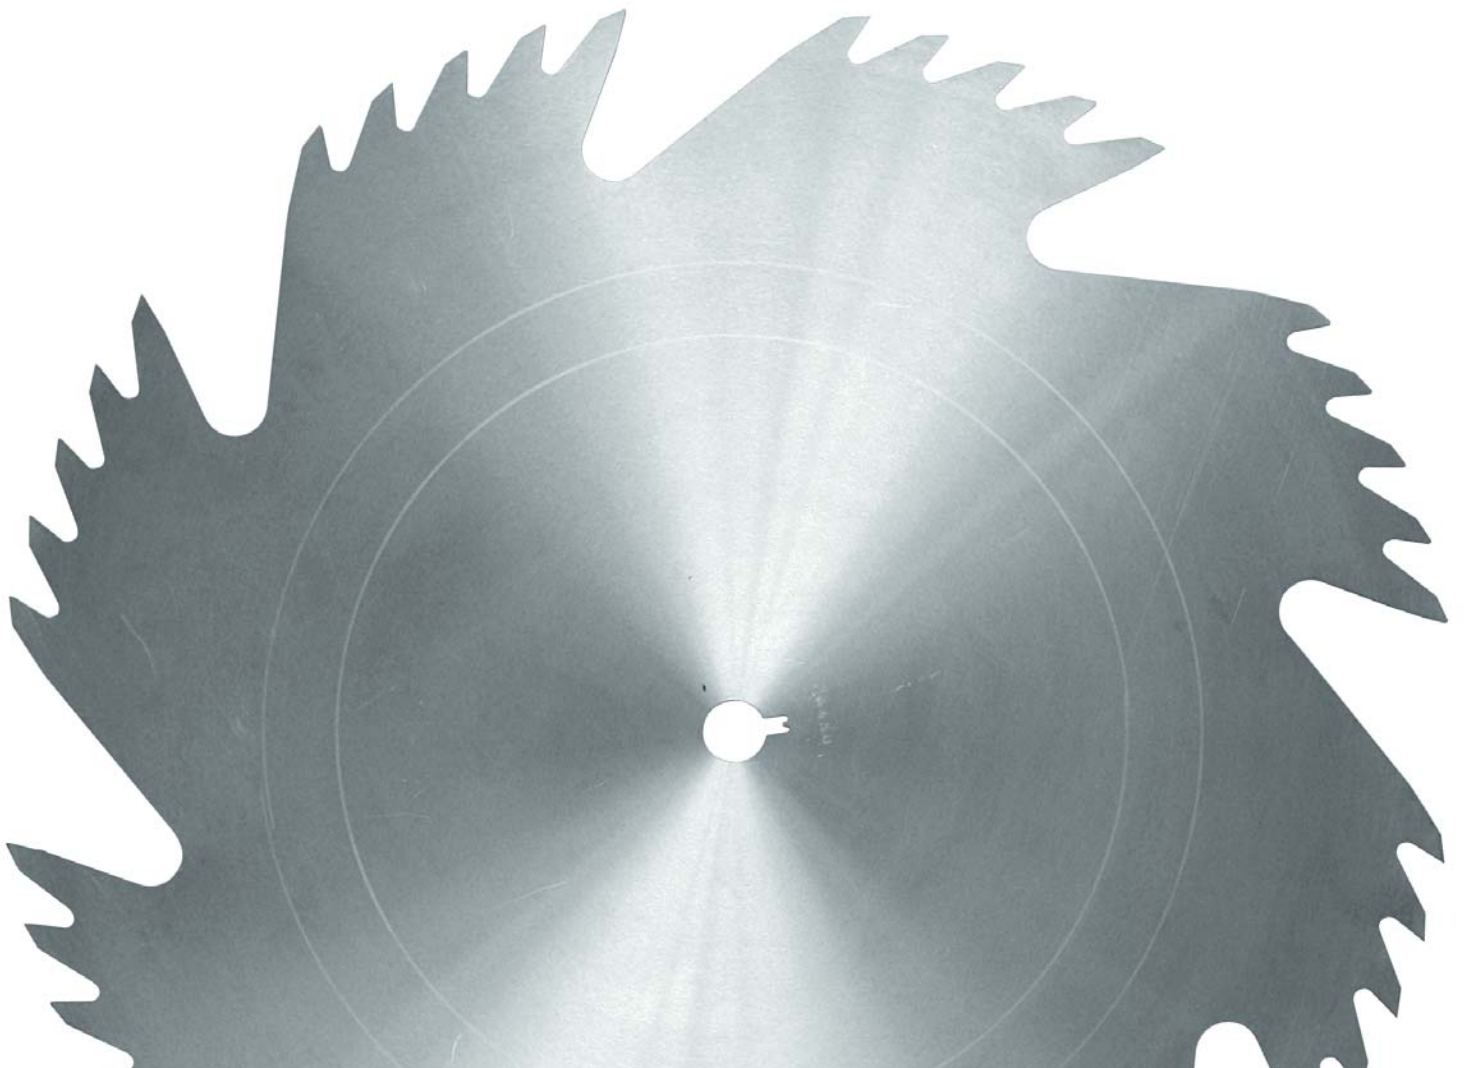

NV – Pointed teeth PV – Arched teeth KV – Wolf's teeth
and special teeth for better chip/dust transport

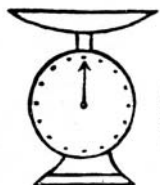

**Chrome-Vanadium
circular saws
(CVA)**

Diameters from
120 to 2,500 [mm]

**Circular saw
versions**

- Carbide-tipped circular saws
- Stellite circular saws (Stellite-tipped ready for use)
- Chrome-Vanadium circular saws for Stellite (optionally with or without capped tips)
- Chrome-Vanadium circular saws, chromed
- Chrome-Vanadium circular saws, unchromed
